## ACCGOLD® — ACCPAC® to GoldMine Bridge

ACCGOLD is the sales automation tool that puts the power of ACCPAC Accounts Receivables and Sales History into the GoldMine user's hands.

- Synchronizes your GoldMine database automatically based on preset date and time with a built-in scheduler
- Links to the Sales History option from the GoldMine file menu, providing the user with detailed sales history (invoice, item number, category, pricing, etc.).
- Selects ACCPAC information to transfer based on your selection formula with filter operators and functions
- Handles multiple address formats for conversion including city and state fields
- Links to GoldMine directly, eliminating the traditional import/export procedures
